ALL OUR PRODUCTS CONTAIN **PINE SEEDS**
THE TREES most commonly used
in our climate zone for **the production**
of PAPER AND WOODEN articles

1 one one one — adult pine "produces" **oxygen necessary** for the lives of three people

1 one one one — tree produces as much oxygen a year as a person consumes **in 2 years of life**

1 one one one — hectare of forest absorbs as much CO_2 as 1 hour as **200 people release it**

GROWNOTEBOOK

ECO-FRIENDLY inside blocks can be made of:

FSC-CERTIFIED PAPER

It's a product of responsible forest management, and it means that the trees, from which it was created, were obtained from legal sources, without violating human rights and nature. FSC is the only certification system supported by major ecological non-governmental organizations like WWF and Greenpeace.

The bleaching process used to whiten paper carried out without the use of chlorine gas. It is uncoated, opaque and has excellent parameters for printing.

RECYCLED PAPER

Is made out of 100% waste paper scrap from FSC certified paper. It is uncoated, opaque, has a matt surface and smooth texture characterized by high quality for printing.

Recycling 1 ton of paper saves:

4115 l of water	**31** kg CO_2	**382** kW h of energy
260 kg of wood	**158** kg of waste	

STONE PAPER

A type of paper that is made out of calcium carbonate 80% (limestone) and bio-polyethylene resin 20% (HDPE). This high flexible and water resistant paper needs 1/3 less ink than classic paper, while maintaining the intensity of the colors.

Recycling 1 ton of paper saves:

200 000 l of water	**75** kg CO_2	**477** kW h of energy
9000 kg of wood	**19** kg of waste	

optional inside-layouts:

• graph
• line
• dotted
• blank

A5 (130x208 mm)

• FSC-certified paper: **192 pages, 80 g/m²**
• recycled paper: **192 pages, 80 g/m²**
• stone paper: **144 pages, 144 g/m²**

PLANTING instructions

1 Soak your seeds in lukewarm water for 24 h. Plant it shallowly in a pot with moist soil and sand (3:1).

2 Gently sprinkle the top with a sand, spray with water.

3 Place the pot in a shady place. When the seeds begin to germinate (10-20 days), give them access to light, avoiding excessive exposure. Moderate amount of water required.

4 Over 2 years of growing in a pot, transplant seedlings into the open ground during the fall (in accordance with applicable laws).

GROWING DICE with seeds

dimentions:: **32×32×32 mm**

seeds

black pine seeds

How to play: Each side of **GROWDICE** has pine tree-shaped eyelets, which correspond to values from 1 to 5. The highest number of eyelets on the cube matches to your logo. **GROWDICE** was made of HDF without glue in assembling. Black pine tree seeds located inside of the dice and secured by foil.

PLAY, DECIDE AND SUPPORT THE ENVIRONMENT!

yes or **no** ?

Can't decide?
THROW THE DICE !

Just throw the dice 3 times and CALCULATE THE SCORE, DIVIDE it by 3 and check-out your answer:

1-3 • the answer is: **yes**
4-6 • the answer is: **no**

PINUS nigra
GREENPLANET

WHY BLACK PINE TREE?
Black pine tree is the most common paper and furniture material in our region.

RESERVED INDUSTRIAL DESIGN

PINE TREE SEEDLING - DPN
(Pinus Nigra) in paperpot container

10 cm
25 cm

YOU SHOULD KNOW:

- black pine is a **fast-growing** tree, reaches up to **40 m** in height
- It is a basic source of wooden furniture and paper pulp
- resistant to salinity and pollution, therefore it is suitable for planting in cities and roads sides
- pile root system is perfect for strengthening dunes and slopes
- shapes well and tolerates pruning

HOW PAPER IS MADE ?

1 TREE = 50 KG of PAPER

1 first you need to prepare paper pulp, i.e. crush the raw material, generally wood

2 paper pulp is mixed with water, glue, inks and other additives, then fulling

3 combine the wet fibers and compress into webs or sheets

4 after drying and cooling, the paper is ready for use

SEEDLING CARE information
black pine

planting: spring or autumn
growing: plants in full sun
min -30 °C
up to 25 m

1 Place the seedling in a bright, any place. Take care that the soil in the pot does not dry out. Transplant into the soil or into a large pot if the roots outgrow the ground.

2 Plant in a thawed and weed-free ground.

3 Cover the surface of the bark mulch.

4 Watering 2-3 times a week for the first month and once a week from the 4th year of planting or depending on weather conditions.

OXYTree GREENPLANET

10 X MORE PRODUCES **than other leafy trees!** O_2

ℹ plant seedling **in accordance with applicable laws place**

OXYTREE SEEDLING - DOXT
(Paulownia) placed in paperpot container

YOU SHOULD KNOW:

• oxytree is extremely fast growing. Six years after planting it reaches 16 m in height and 35 cm in diameter

• well adapted to different climatic conditions and soil

• it needs huge amounts of carbon dioxide for the rapid growth and produces oxygen in photosynthesis

• grow again after cutting. Produces 4 times more wood than other native species in 20 years

• is widely used in furniture industry - wardrobes, tables, chairs

• thanks to lightness and water resistance it has been appreciated by producers of yachts, ships and surfin boards
